

# THE MOST INNOVATIVE WAY TO BEAT CANCER IS RIGHT BEFORE YOUR EYES.

They come from cancer centers across the nation to join ours – one of the top five busiest cancer programs in the country, New Jersey's largest, and the one ranked the best cancer center in New Jersey by *New York* magazine. Where the most innovative way to beat cancer is not so much found in our technologies and modern facilities – but in the people who drive them: Our world-renowned doctors.

Doctors who were recruited from places like the National Cancer Institute, Fred Hutchinson, M.D. Anderson, and Mayo Clinic, just to name a few. Recruited because of their groundbreaking research and novel treatment approaches. Recruited because they can continue their work here at The Cancer Center.

Where patients not only have access to world-wide clinical trials – but better yet, to the doctors who imagined them. Where care is directed by a nationally renowned doctor, who's always in charge, on site, and there for you.

It's a new way to deliver cancer care. A better way. Where the country's brightest doctors fight cancer using all of medicine's most advanced techniques and in collaboration with each other. Giving patients the most innovative and personalized ways to beat cancer.

The Cancer Center. Bringing You Tomorrow's Breakthroughs. Today.
